

Priya Nair

DATA SCIENTIST & MACHINE LEARNING ENGINEER

Email: priya.nair.ml@gmail.com | Phone: +91 98765 43211 | Mumbai, India | LinkedIn: linkedin.com/in/priya-nair-dsml

PROFESSIONAL SUMMARY

Accomplished and analytical Data Scientist & Machine Learning Engineer with 7+ years of independent consulting and freelance experience specializing in the design, training, and production deployment of enterprise-grade AI frameworks. Proven expertise in building robust predictive models, optimizing Deep Learning architectures, and architecting end-to-end data analytics pipelines. Skilled at converting raw corporate datasets into strategic data products, building real-time dashboards for business intelligence, and optimizing cloud-native ML models for high-scale environments.

CORE SKILLS

Python

Pandas

Scikit-Learn

TensorFlow

SQL

Power BI

AWS SageMaker

FREELANCE EXPERIENCE OVERVIEW

Lead Data Science & ML Consultant (2019 – Present)

Partnered with international enterprise clients within the e-commerce, banking, and healthcare domains to deliver bespoke intelligent systems. Responsible for managing full data lifecycles—ranging from establishing high-performance SQL ETL pipelines to tuning advanced Deep Learning models and structuring interactive data visualizations. Successfully executed over 12 global remote contracts while ensuring complete data compliance and rigorous validation standards.

ENTERPRISE AI PROJECTS

1. Multi-Modal Customer Churn & Lifetime Value (LTV) Engine

Technologies: Python, Pandas, Scikit-Learn, SQL, Power BI

- Constructed an end-to-end churn prediction pipeline using Scikit-Learn ensembles, lowering annualized customer attrition by 18%.
- Processed and structured over 10 million rows of transactional behavior logs utilizing highly optimized SQL procedures and Pandas.
- Designed a real-time executive Power BI tracking matrix providing interactive drill-downs into risk cohorts and segment performance metrics.

2. Computer Vision Quality Inspection Framework

Technologies: Python, TensorFlow, AWS SageMaker, SQL

- Engineered a Deep Learning convolutional neural network (CNN) within TensorFlow to identify manufacturing surface defects in real-time.
- Managed automated hyperparameter tuning and modern distributed training runs leveraging AWS SageMaker instances.
- Integrated inference logs into centralized SQL systems, improving standard structural defect recognition accuracy to 98.4%.

3. Enterprise Market Sentiment & Demand Intelligence Pipeline

Technologies: Python, Pandas, TensorFlow, AWS SageMaker, Power BI

- Built an asynchronous web-scale NLP sentiment scoring framework evaluating daily financial headlines and industry publications.
- Deployed highly optimized transformers via AWS SageMaker endpoints, supporting downstream real-time corporate asset positioning models.
- Generated dynamic interactive dashboards in Power BI to track cross-market sentiment shifts and demand forecasting variables.

4. Financial Fraud & Anomaly Identification Architecture

Technologies: Python, Scikit-Learn, SQL, AWS SageMaker

- Developed an unsupervised isolation forest and gradient-boosting pipeline to capture anomalous corporate banking transactions.
- Engineered complex feature extraction routines based on historical transactional variance windows utilizing SQL window functions.
- Deployed automated shadow testing pipelines via SageMaker Model Monitor to regularly mitigate live inference feature drift.

KEY STRENGTHS

- **End-to-End ML Ops Pipelines:** Complete practical comfort implementing clean feature engineering scripts through cloud production monitoring loops.
- **Business-First Analytics Translation:** Adept at turning intricate neural behavior weights into crisp, actionable Power BI stories for leadership teams.
- **Scalable Data Engineering:** Skilled in database structuring and query tuning, preventing performance bottlenecks prior to model ingest.

CERTIFICATIONS

AWS Certified: AWS Certified Data Engineer – Associate / Machine Learning Specialty
Data Analytics: Microsoft Certified: Power BI Data Analyst Associate

EDUCATION

Degree: Master of Science (M.Sc.) in Data Science & Analytics
Timeline: Graduated 2019

Declaration: I hereby declare that all the information stated above in this resume is true, complete, and correct to the best of my knowledge and belief.
